

ELECTRO-PNEUMATIC POSITIONER - TZID-C

TYPE 5400

GENERAL

INPUT SIGNAL:	4 - 20 mA, TWO-WIRE TECHNOLOGY
STROKE RANGE:	10 - 90 MM RESP. 25°-120°
SUPPLY AIR:	ATMOSPHERIC
AIR PRESSURE:	1.4 - 6 BAR (20-90 PSI)
CONTROL ACCURACY:	≤0.5%
AMBIENT TEMPERATURE:	-40°C TO +85°C
HOUSING:	ALUMINUM COATED, IP65
VIBRATION IMMUNITY:	10 G AT 20-80HZ

OPTIONS

EX PROTECTION:	EEx ib II C T6
PLUG-IN MODULES FOR:	ANALOG POSITION FEEDBACK DIGITAL POSITION FEEDBACK (FOR MIN./MAX. POSITION) SAFETY SHUTDOWN MODULE.
KIT FOR SWITCH BOX:	INDUCTIVE SENSOR (NC OR NO) MECHANICAL MICRO SWITCH 24V AC/DC
ACCESSORIES:	PRESSURE GAUGE BLOCK FILTER REGULATOR

APPLICATION

Flow control

Temperature control on a heat exchanger.

Media type: Steam, hot, water, hot oil, ice water, glycol etc.

Pressure control / bypass valve

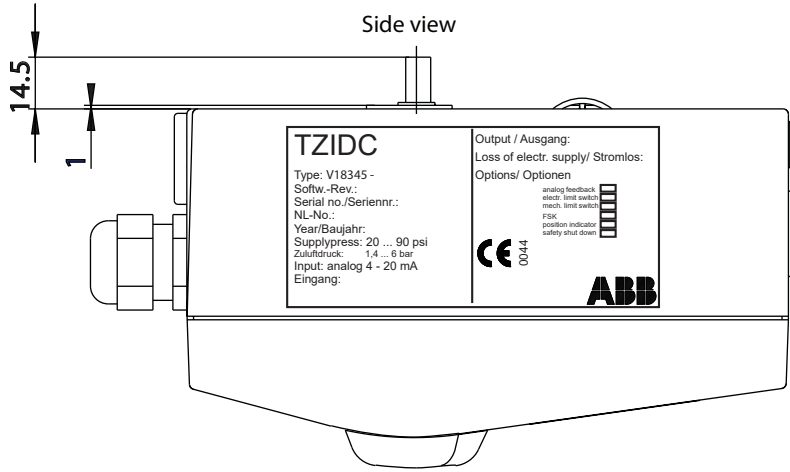

DESCRIPTION

- Documented lowest air consumption on the market.
- Only needs to pull one cable (2 wires), as the TZID-C operates on 3,6 mA.
- 4-20 mA, 20-4 mA and split range.
- Flapper - Nozzle principle
Advantages:
Less sensitive to vibrations.
Regulates on low supply air.
- Available with Profibus and Foundation Fieldbus.
- Easy initialisation - only needs one touch.
- Optimised algorithm for extremely fast and accurate positioning.
- Integrated diagnostical function.
- Available with Belzona coating for demanding environments.
- Robust design and function.
- Visual indicator.
- Large program span with many options.
